

TENNYSON OUTPATIENT SERVICES

Tennyson is now offering outpatient therapy services to better serve children, parents, and families. Our goals are to meet the needs of kids and families, including parents, before they need our more intensive services, and to continue to foster the success of clients who are ready to “step down” from our traditional services.

Our outpatient services are available to children, teens, and adults with Medicaid and those wishing to private pay. Services include personalized care coordination, ensuring that the various needs of clients and families are met. We understand it is challenging to focus on meeting one’s emotional needs while trying to meet basic needs.

Services

- Diagnostic and services assessment
- Individual therapy
- Family therapy
- Care coordination

We are currently providing services via telehealth and taking new inquiries and referrals through our Admissions team.
