

4.0 DATA

QUARTERLY OUTCOMES REPORT: OCTOBER-DECEMBER, FY21

Tennyson Center for Children invests heavily in understanding our impact so that we can constantly improve our services to families and children throughout Colorado. We have been entrusted to help children and families experiencing trauma stabilize, heal, and reintegrate back into their communities, and must hold ourselves accountable to that charge. By constantly evaluating our impact we can pilot and test innovative solutions, strengthen existing partnerships and build new ones, and work to scale positive results while constantly searching for ways to improve.

QUARTERLY OUTCOMES REPORT: OCTOBER-DECEMBER, FY21

STABILIZING

Stabilize children and families to prepare for therapy. We strive to do what's best for kids and families — always.

HEALING

Teach each child tools and strategies to overcome their unique trauma, promote coping, healing, and hope.

REINTEGRATING

Provide families and children with the necessary tools to reintegrate back into healthy habits and communities.

COMMUNITY BASED SERVICES (CBS)

99% of children remained in their homes; **99%** of children maintained school placement; **96%** of children did not have police contact while in treatment; **99%** with no punitive police contact¹; **95%** of children did not utilize hospitals; and **96%** of children were not admitted to hospitals.

71% of children demonstrated overall improved functioning according to CANS assessment. **81%** of children whose trauma stress symptoms improved according to CANS assessment.²

What we're working on:
The number of children who remain in home **12, 24, and 36** months post discharge; and
The number of children who maintain school placement **12, 24, and 36** months post-discharge

CAMPUS SERVICES

67% of children did not have police contact while in treatment; **95%** with no punitive police contact; **77%** of children did not utilize hospitals; and **93%** of children were not admitted to hospitals.

75% of children demonstrated overall improved functioning according to CANS assessment. **63%** of children whose trauma stress symptoms improved according to CANS assessment.

56% of children who exited to a permanent family or family like placement.³

What we're working on:
The number of children that maintain permanent placement **12, 24, and 36** months post-discharge; and
The number of children who remain without hospitalizations or police contacts **12, 24, and 36** months post discharge.

KEY HIGHLIGHT

99%
of campus children remained
in their home

We prioritize the stabilization of families and the healing of children through the reduction of trauma stress symptoms. 99% of campus children have remained in their home after leaving campus, and 81% of children have reduced trauma symptoms, which is a 41% increase over the last year. We are pleased to present our success in both areas!

81%
of Community Based
Services children saw a
reduction in trauma stress
symptoms

SHARE THE DATA

How can this data be used?

You can support Tennyson Center for Children and our efforts to support vulnerable children and families.

- **Connect** with your community to make data-driven, informative decisions;
- **Educate** your community and partners by building awareness about this data; and
- **Advocate** for children and families by using this data for policy statements, grants, and presentations.

¹Punitive police contact defined as arrest or ticket issued

²Demonstrate improved functioning according to Child and Adolescent Needs and Strengths (CANS) assessment. Overall positive increase from baseline assessment to discharge assessment

³Permanent family or family like placement – defined as birth parents of child, adoption or any kin
